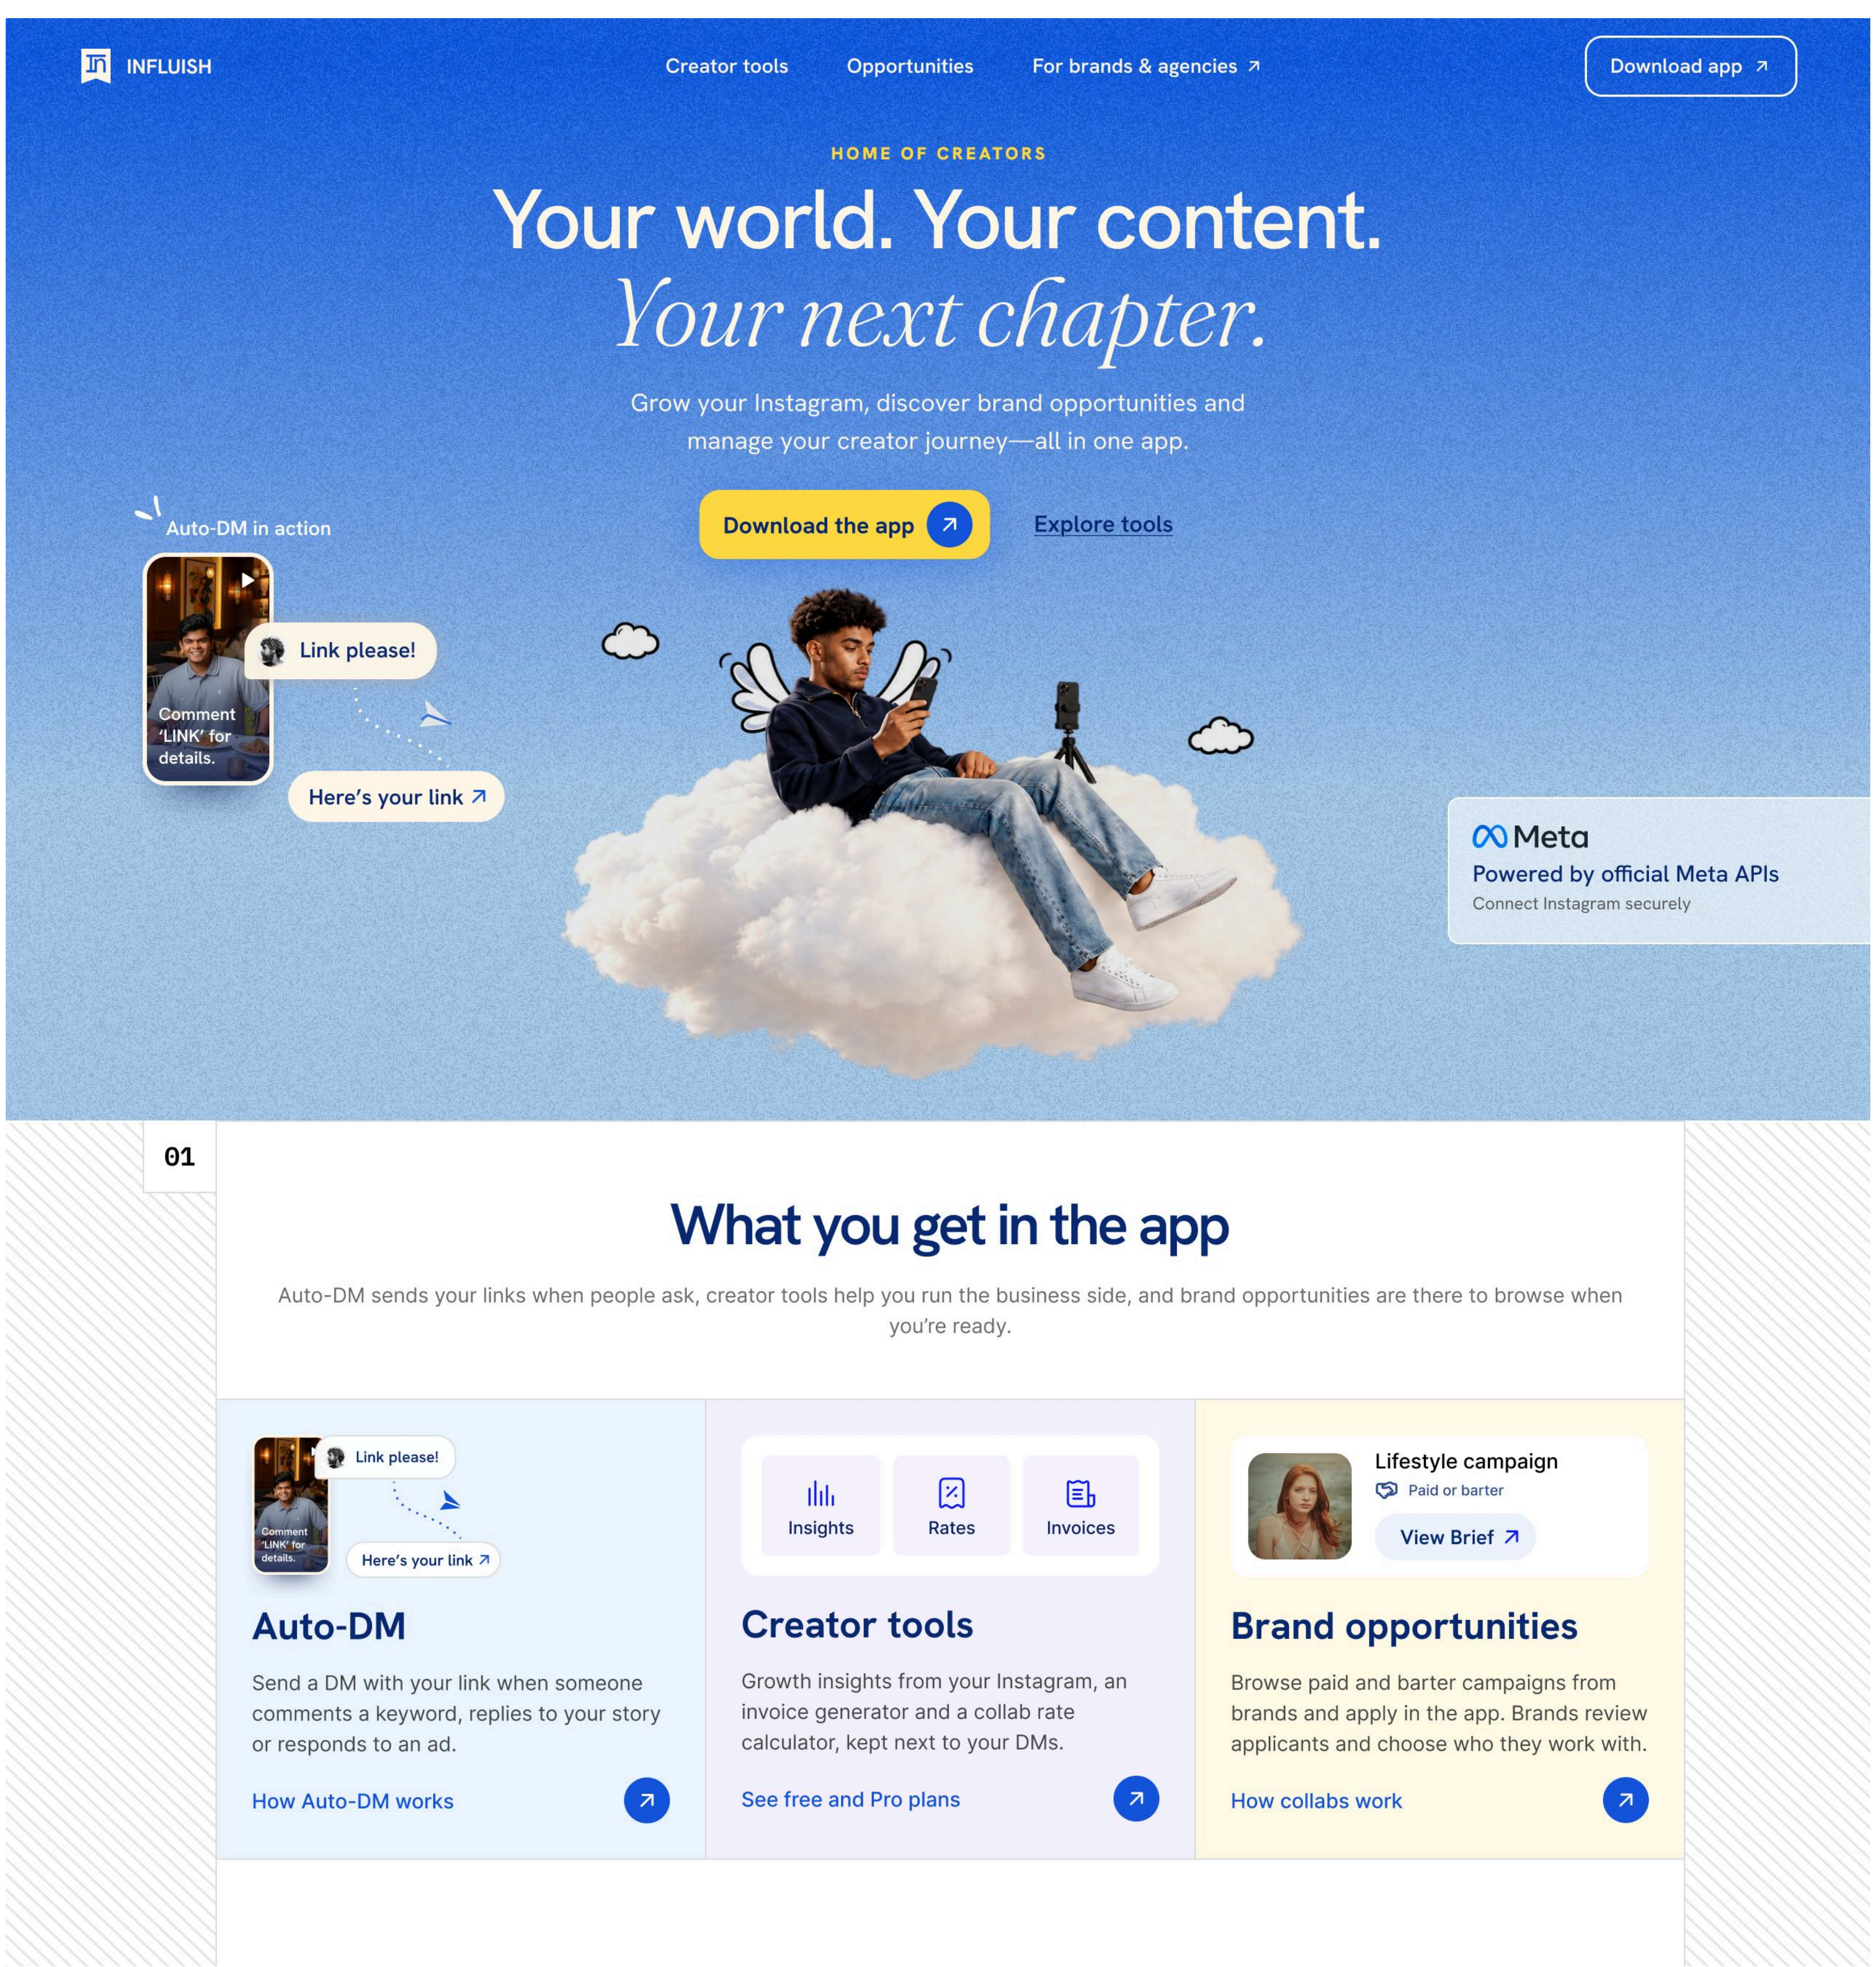
INFLUISH / APP HOME & WEBSITE REDESIGN CONCEPT

A clearer first step for creators.

An exploration of how a creator platform can explain its tools and make the next action easier to find.

A welcoming introduction to the creator toolkit.

A playful visual direction paired with a clear product message and a visible download action.



Your world. Your content. *Your next chapter.*

Grow your Instagram, discover brand opportunities and manage your creator journey—all in one app.

What you get in the app

Auto-DM sends your links when people ask, creator tools help you run the business side, and brand opportunities are there to browse when you're ready.

Auto-DM

Send a DM with your link when someone comments a keyword, replies to your story or responds to an ad.

How Auto-DM works ↗

Creator tools

Growth insights from your Instagram, an invoice generator and a collab rate calculator, kept next to your DMs.

See free and Pro plans ↗

Brand opportunities

Browse paid and barter campaigns from brands and apply in the app. Brands review applicants and choose who they work with.

How collabs work ↗

Mobile / Same message, adapted for a smaller screen

WHAT I WANTED TO IMPROVE

Make the next action easier to spot.

My design observation: several promotions compete for attention on the home screen.

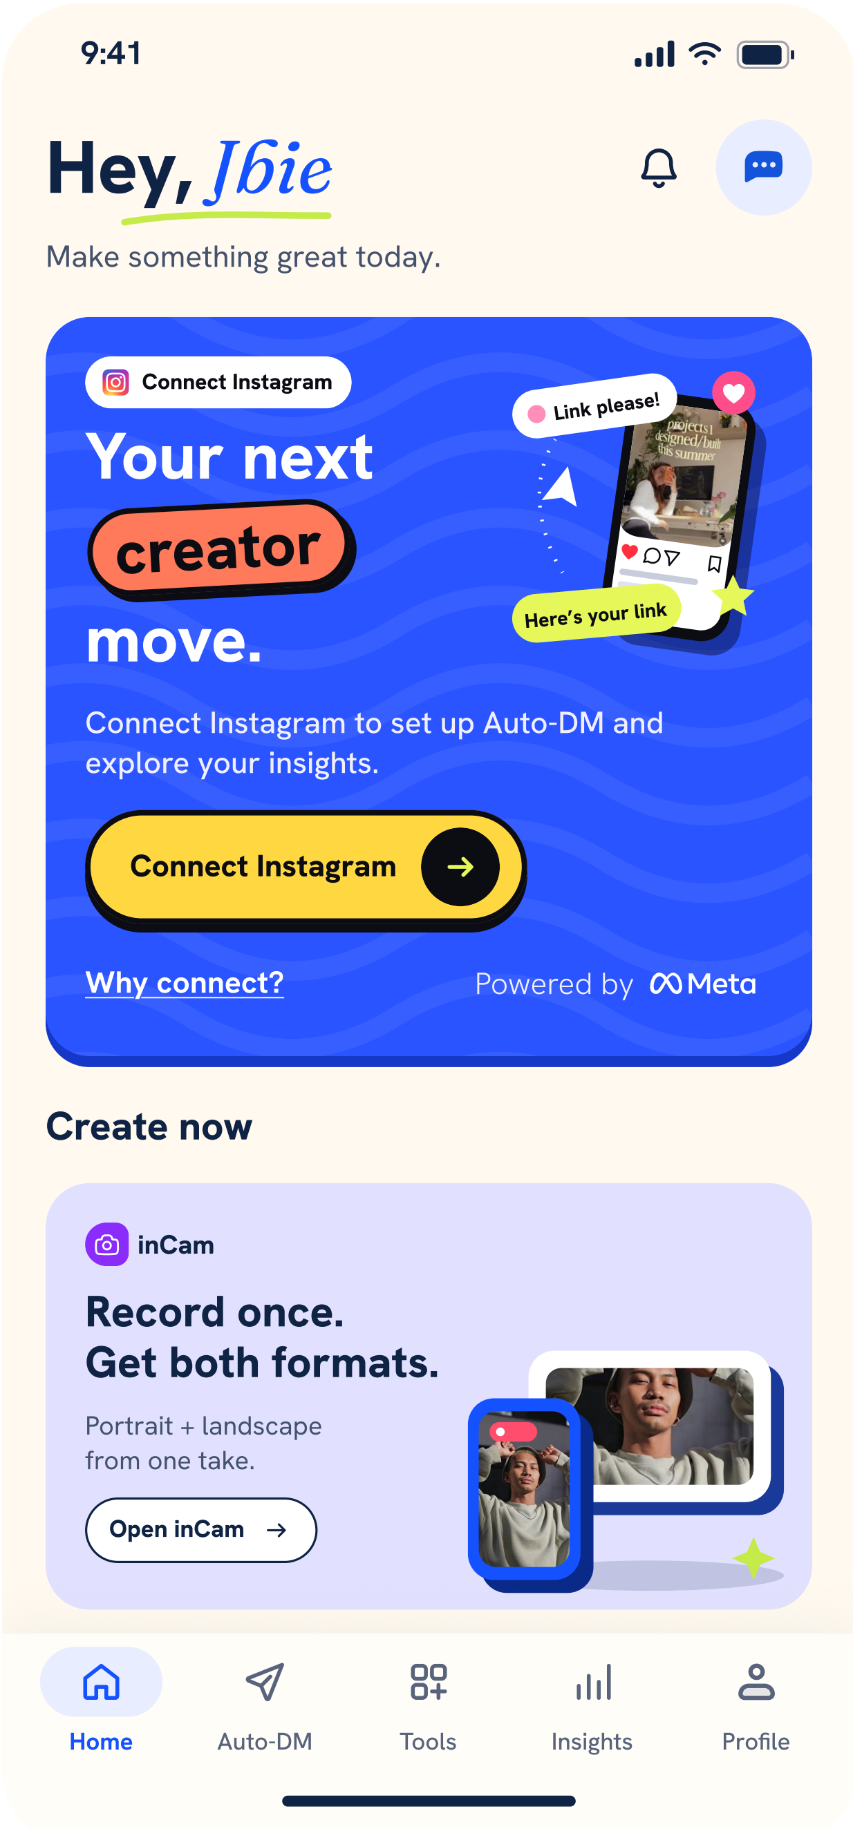
THE RESPONSE

Let the home adapt to setup progress.

Prioritise connecting Instagram first, then setting up the first Auto-DM. Keep other tools available below.

One home. Two useful starting points.

01 / CONNECT INSTAGRAM



Make something great today.

Your next creator move.

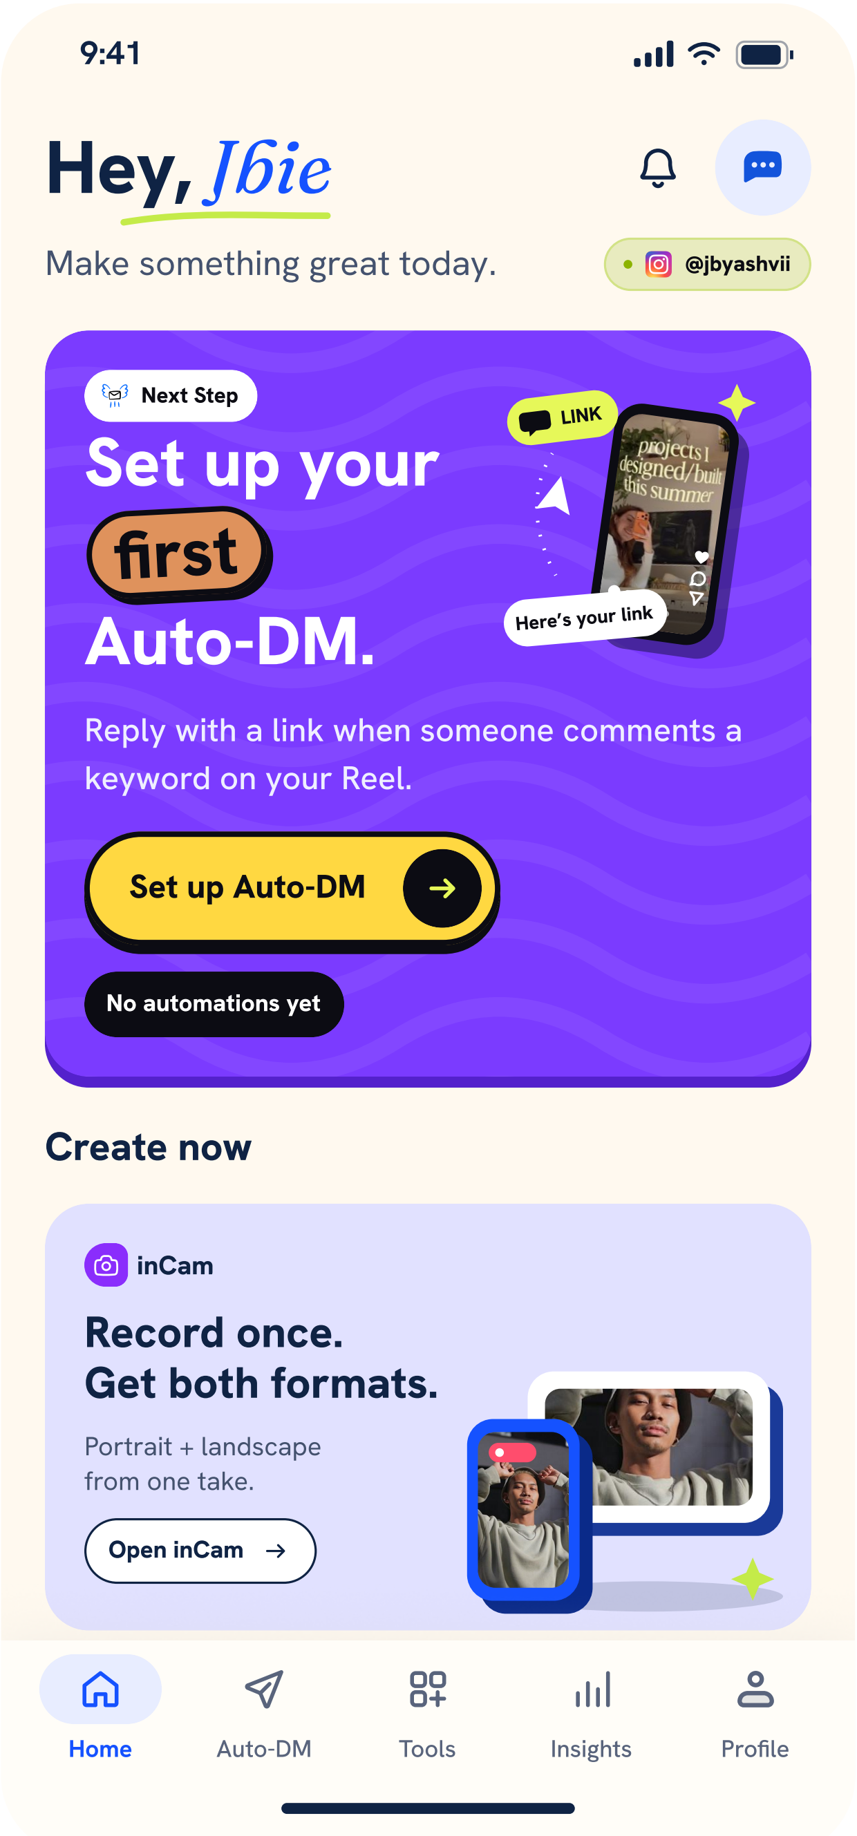
Connect Instagram to set up Auto-DM and explore your insights.

Record once. Get both formats.

Portrait + landscape from one take.

Explain why connection is needed and give it one clear primary action.

02 / SET UP YOUR FIRST AUTO-DM



Make something great today.

Set up your first Auto-DM.

Reply with a link when someone comments a keyword on your Reel.

Record once. Get both formats.

Portrait + landscape from one take.

Once connected, replace the connection prompt with the next setup action.

A clear primary action

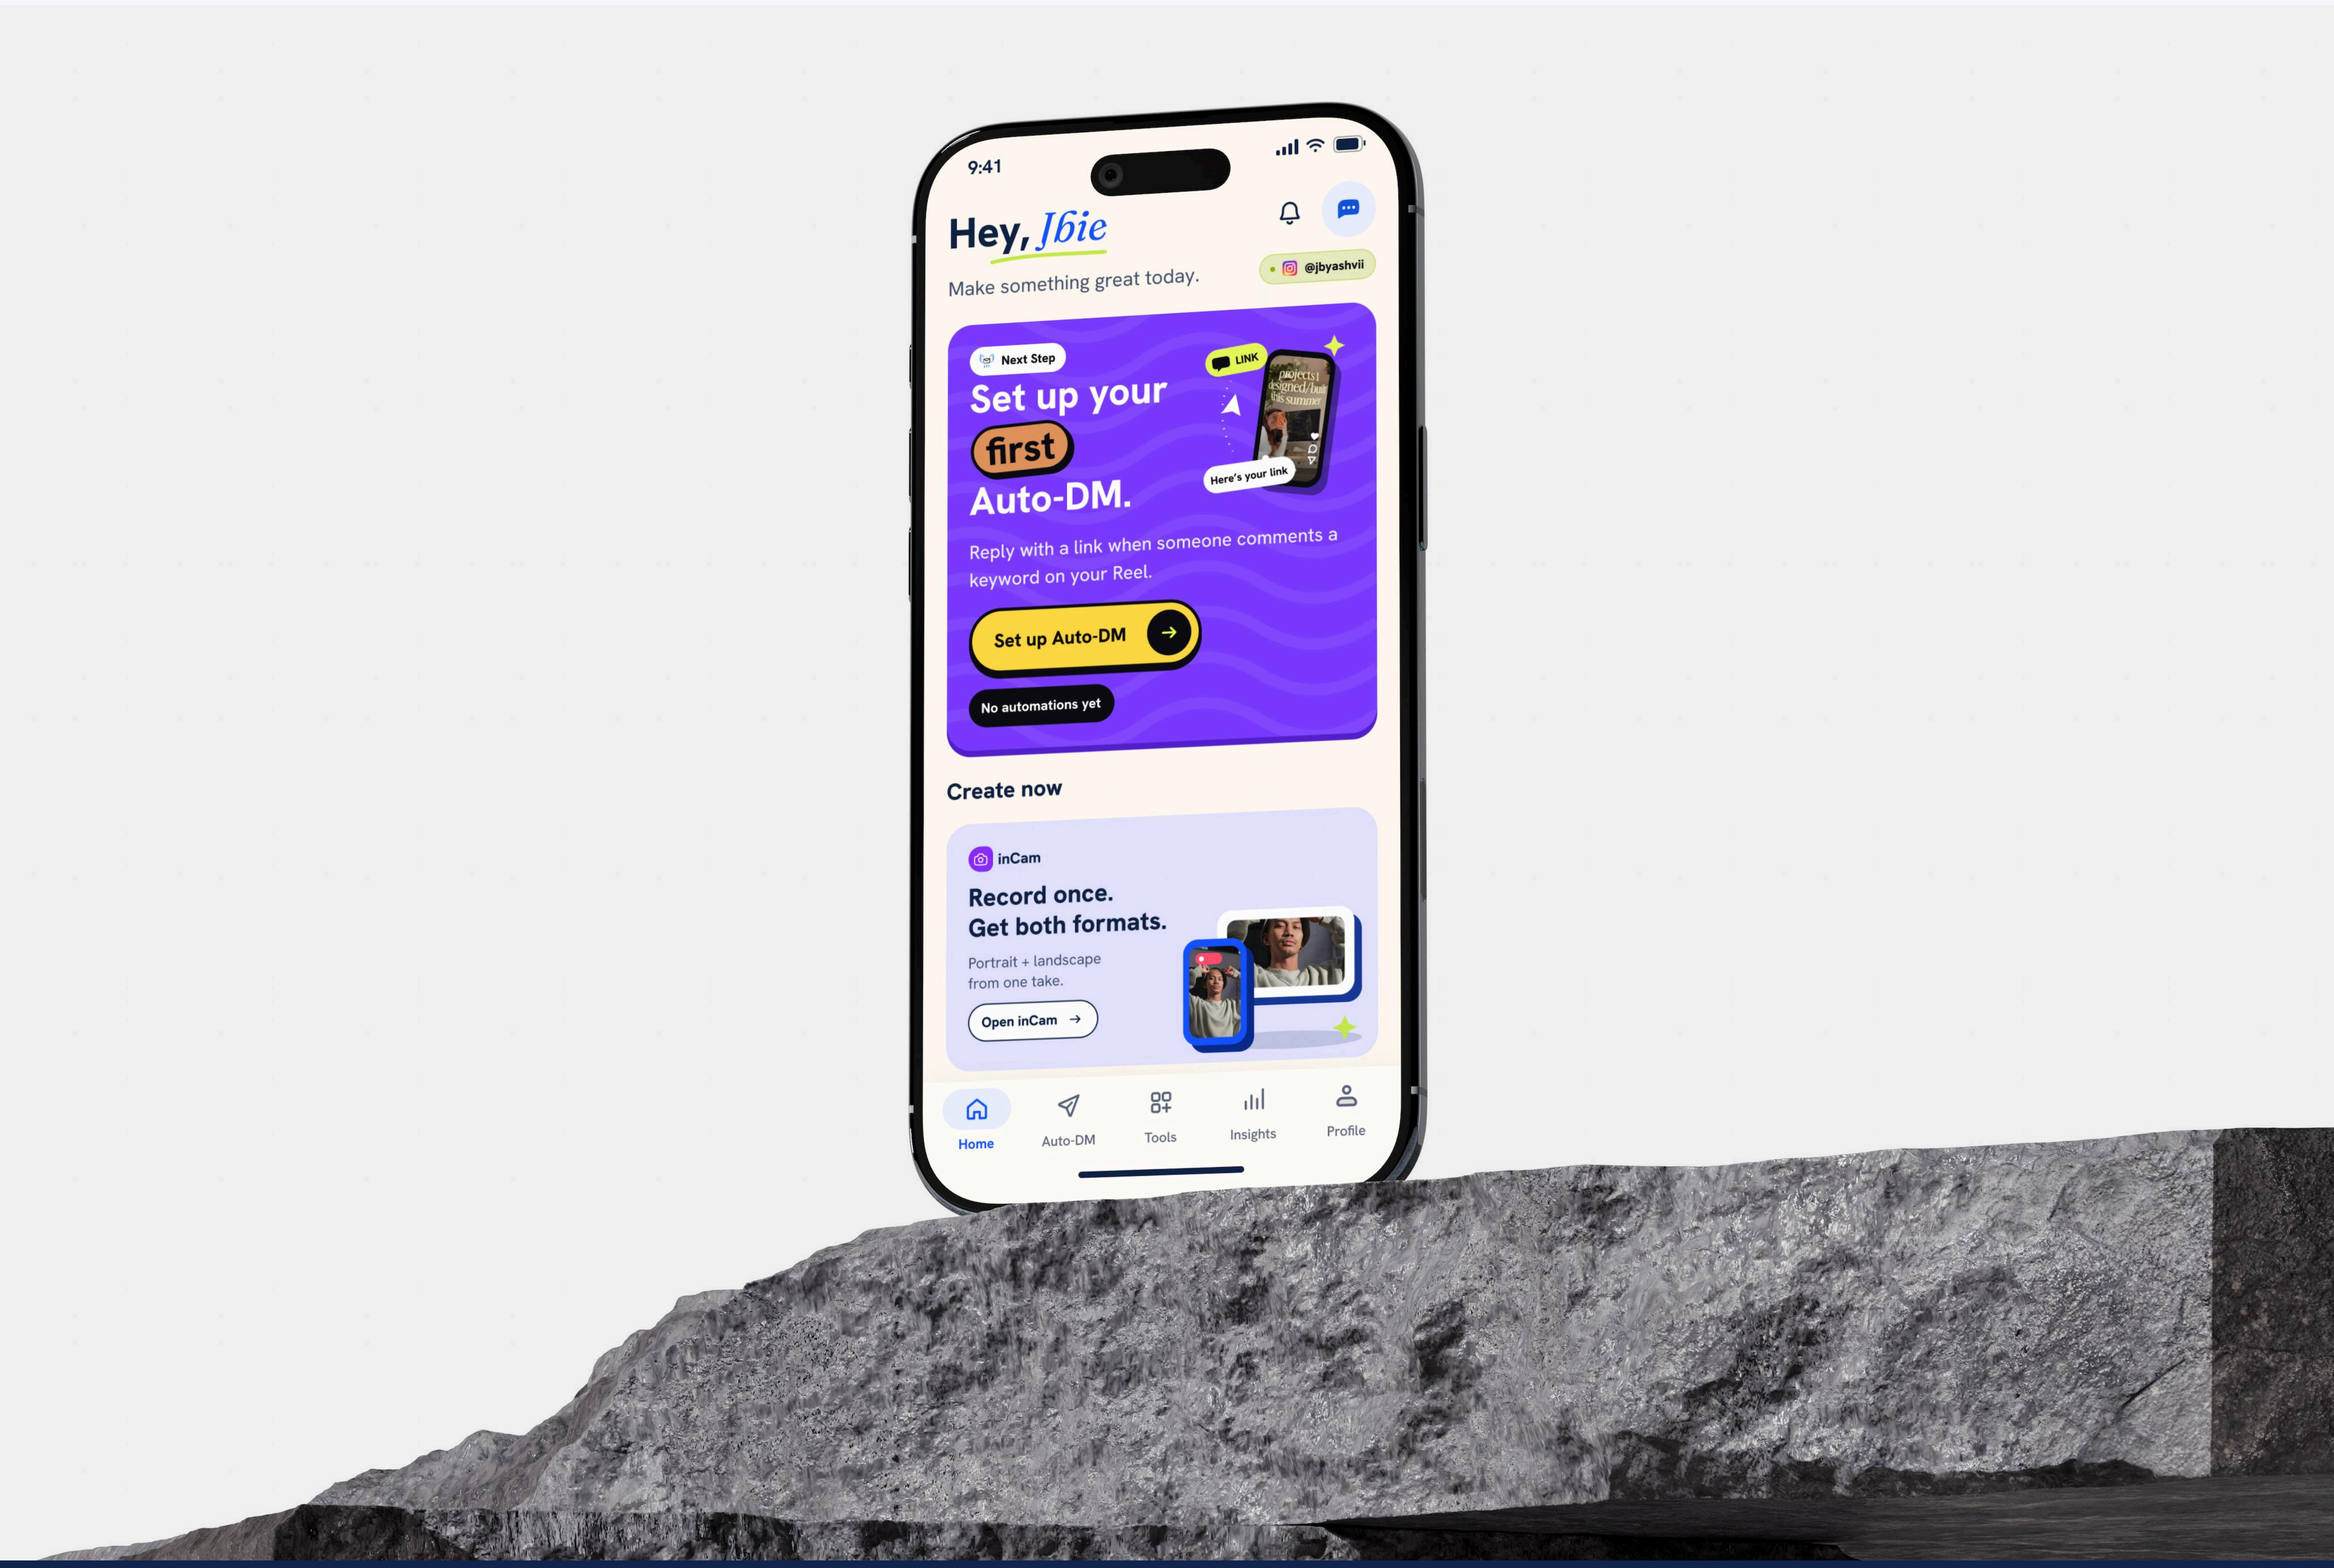
The main CTA follows the creator's current setup state.

A creator-focused identity

Bold colours, sticker-like details and compact illustrations add personality.

Tools within reach

Auto-DM, insights and brand opportunities remain easy to discover.



Make something great today.

Set up your first Auto-DM.

Reply with a link when someone comments a keyword on your Reel.

Record once. Get both formats.

Portrait + landscape from one take.

DESIGN EXPLORATION / NOT A SHIPPED PRODUCT

Scope: app home states and website introduction. The connected empty state is a proposed scenario; its live behaviour was not verified. No measured outcomes are claimed.
