
Acme Logistics AI-generated draft · Review required

Sales owner: Priya Raman
CS owner: Unassigned
Contract signed: Oct 15, 2026
Target launch: Nov 13, 2026
Human-reviewed: 4 of 14 details

2 flagged gaps still need review before this handoff can be accepted.

Customer goals 3

Launch timing	Go live at the Reno distribution center within 30 days of signing Source-backed · Not reviewed yet	2 excerpts
Operational outcome	Reduce manual pick-list reconciliation, currently about 6 hours per week per site Source-backed · Not reviewed yet	1 excerpt
Possible expansion	May expand to three more warehouses after the Reno pilot. Customer said "no promises yet". AI-inferred · Not reviewed yet	1 excerpt

Stakeholders 4

Dana Whitfield	VP Operations · Executive sponsor Source-backed · Not reviewed yet	2 excerpts
Marcus Lee	Procurement Manager · Contract and invoicing contact Source-backed · Not reviewed yet	1 excerpt

JK Jordan Kim
CS Manager

EVIDENCE

Launch timing

Go live at the Reno distribution center within 30 days of signing

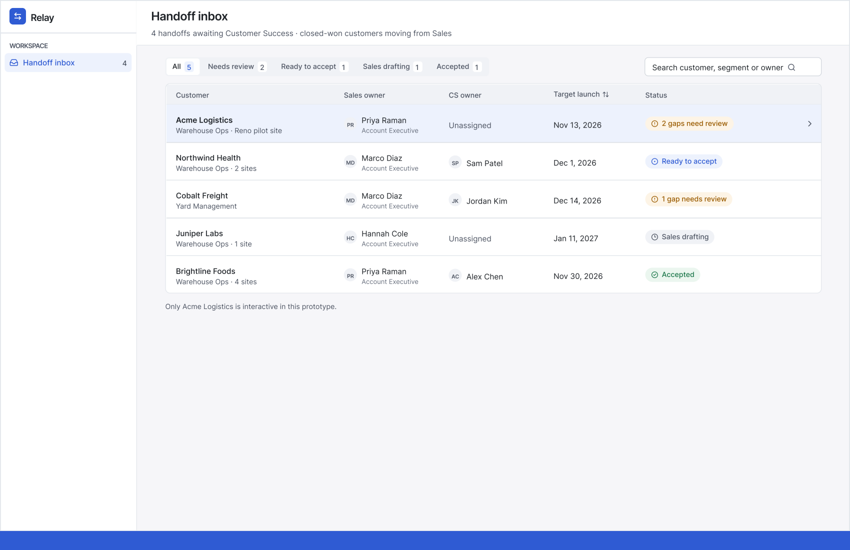
Evidence: Source-backed
Review: Not reviewed yet

Check the excerpts below. Marking reviewed records that you verified this detail.

2 transcriptexcerpts

Discovery call · Sep 9, 2026 00:04:12
DW **Dana Whitfield** VP Operations, Acme Logistics
The board wants Reno live before peak season. Realistically we need to be up and running within 30 days of signing.

Contract walkthrough · Oct 14, 2026 00:15:33
DW **Dana Whitfield** VP Operations, Acme Logistics
So we sign tomorrow, and Reno goes live by November 13. That's the date I'm taking to the board.



Handoff inbox

4 handoffs awaiting Customer Success · closed-won customers moving from Sales

Customer	Sales owner	CS owner	Target launch ⇅	Status
Acme Logistics Warehouse Ops · Reno pilot site	PR Priya Raman Account Executive	Unassigned	Nov 13, 2026	2 gaps need review ›
Northwind Health Warehouse Ops · 2 sites	MD Marco Diaz Account Executive	SP Sam Patel	Dec 1, 2026	Ready to accept

Juniper Labs Warehouse Ops · 1 site	HC Hannah Cole Account Executive	Unassigned	Jan 11, 2027	Sales drafting
Brightline Foods Warehouse Ops · 4 sites	PR Priya Raman Account Executive	AC Alex Chen	Nov 30, 2026	Accepted

Only Acme Logistics is interactive in this prototype.

Relay — a clearer handoff from Sales to CS.

A desktop workspace that turns meeting context into a customer brief, helps teams check uncertain details, and gives the next step a clear owner.

INDEPENDENT CONCEPT · UX/UI & INTERACTIVE PROTOTYPE · AI-ASSISTED PROTOTYPING

01 / THE CHALLENGE

A signed deal still needs a clear handoff.

The design question: how can CS start onboarding without losing important sales context?

Context is scattered

Goals, dates and commitments can be spread across meeting notes, transcripts and messages.

A request can look like a promise

“We want this at launch” needs different treatment from a delivery commitment confirmed by Sales.

Open items need owners

Missing information should stay visible, with someone responsible for following up.

One scenario, two people

Sales prepares the customer context. Customer Success checks it before taking ownership. In this example, the NetSuite delivery date is unconfirmed and the customer’s technical contact is missing.

Basis: a workflow hypothesis explored through a concept prototype. No customer interviews or usability study have been completed for this case study.

02 / USER FLOW & AI ASSISTANCE

What happens on the platform?

Follow one customer from the inbox to a reviewed handoff. CS means Customer Success—the team responsible for onboarding after the sale.

01 Open a customer handoff

Sales or Customer Success opens the inbox and selects a customer that needs review.

↓

02 Read the brief and inspect the evidence

Check goals, stakeholders, launch timing and commitments. Open source excerpts to see what was actually said.

↓

03 Review every flagged gap

For each missing or uncertain detail, choose one of the two paths below.

Resolve the gap

Record the confirmed detail and its source.

Keep it open

Mark the detail unconfirmed and choose a follow-up owner.

↓ Both paths continue after every flagged gap has been reviewed

04 Confirm who owns the handoff

Choose a CS owner. If a follow-up remains open, acknowledge that it will continue into onboarding.

↓

05 Accept the handoff

The acceptance is recorded. CS can continue with the onboarding checklist and any assigned open work.

If a flagged gap is still unreviewed or an owner is missing, acceptance is blocked and the reviewer returns to the missing step.

AI assistance in the concept

Organizes a draft brief from meeting content. Surfaces possible gaps and proposes onboarding tasks. Evidence labels show what supports a detail.

The human decision

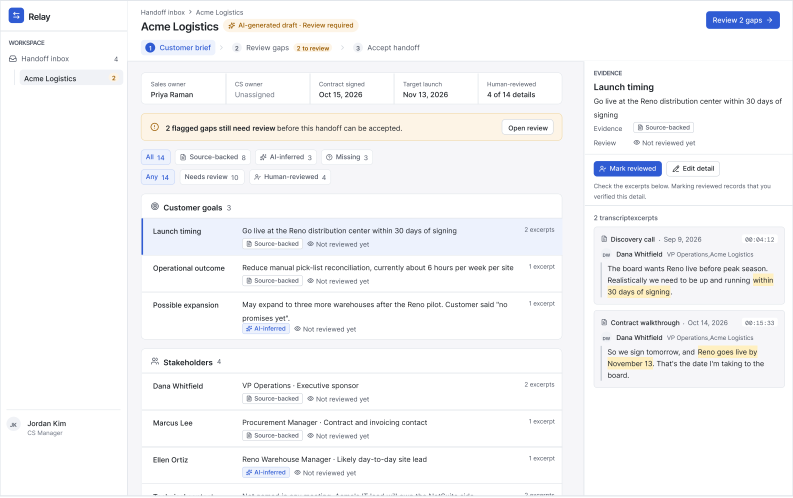
Checks the source, edits details, confirms missing information and assigns owners. A draft or source-backed detail is not automatically human-reviewed.

Prototype note: AI outputs are simulated with local mock data. There is no live model or automatic external action in this demo.

03 / CUSTOMER BRIEF

One customer brief, with context attached.

Goals, stakeholders, requests and commitments are reviewed in one workspace.



Acme Logistics AI-generated draft · Review required

2 transcriptexcerpts

Discovery call · Sep 9, 2026 `00:04:12`

DW **Dana Whitfield** VP Operations,Acme Logistics

> The board wants Reno live before peak season. Realistically we need to be up and running within 30 days of signing.

Contract walkthrough · Oct 14, 2026 `00:15:33`

DW **Dana Whitfield** VP Operations,Acme Logistics

> So we sign tomorrow, and Reno goes live by November 13. That's the date I'm taking to the board.

Group information by the job — Sections match what CS needs to prepare for onboarding.

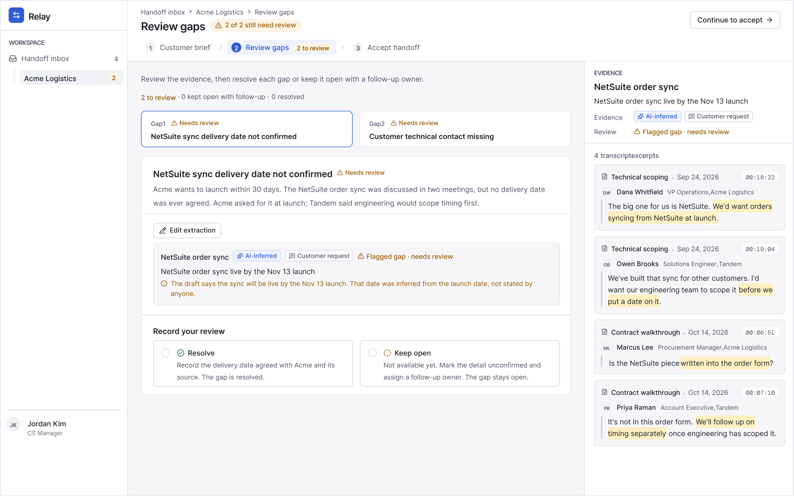
Keep evidence and review separate — A source-backed fact can still need a person to check it.

Explain the classification — Customer requests and Sales commitments remain distinct.

04 / REVIEW GAPS

Review the gap beside the evidence.

The reviewer can compare an AI draft with the actual transcript excerpt.



Handoff inbox > Acme Logistics > Review gaps

Review gaps ⚠ 2 of 2 still need review

Continue to accept →
1 Customer brief > 2 Review gaps 2 to review > 3 Accept handoff

Review the evidence, then resolve each gap or keep it open with a follow-up owner.

2 to review · 0 kept open with follow-up · 0 resolved

Gap1 ⚠ Needs review
NetSuite sync delivery date not confirmed

Gap2 ⚠ Needs review
Customer technical contact missing

NetSuite sync delivery date not confirmed ⚠ Needs review

Acme wants to launch within 30 days. The NetSuite order sync was discussed in two meetings, but no delivery date was ever agreed. Acme asked for it at launch; Tandem said engineering would scope timing first.

NetSuite order sync · AI-inferred · Customer request · ⚠ Flagged gap · needs review

NetSuite order sync live by the Nov 13 launch

ⓘ The draft says the sync will be live by the Nov 13 launch. That date was inferred from the launch date, not stated by anyone.

Record your review

○ Resolve
Record the delivery date agreed with Acme and its source. The gap is resolved.

○ Keep open
Not available yet. Mark the detail unconfirmed and assign a follow-up owner. The gap stays open.

EVIDENCE

NetSuite order sync

NetSuite order sync live by the Nov 13 launch

4 transcriptexcerpts

Technical scoping · Sep 24, 2026 · 00:18:22
DW **Dana Whitfield** VP Operations,Acme Logistics
> The big one for us is NetSuite. We'd want orders syncing from NetSuite at launch.

Technical scoping · Sep 24, 2026 · 00:19:04
OB **Owen Brooks** Solutions Engineer,Tandem
> We've built that sync for other customers. I'd want our engineering team to scope it before we put a date on it.

Contract walkthrough · Oct 14, 2026 · 00:06:51
ML **Marcus Lee** Procurement Manager,Acme Logistics
> Is the NetSuite piece written into the order form?

Contract walkthrough · Oct 14, 2026 · 00:07:10
PR **Priya Raman** Account Executive,Tandem
> It's not in this order form. We'll follow up on timing separately once engineering has scoped it.

Make uncertainty visible -The NetSuite launch claim is flagged because the delivery date is not confirmed.

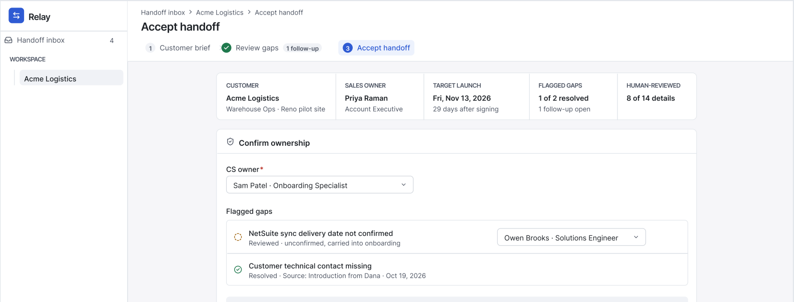
Offer two honest paths - Resolve it with a recorded source, or keep it open with a follow-up owner.

Keep the source close - Speaker, meeting and timestamp make the decision easier to trace.

05 / ACCEPT THE HANDOFF

Accept a handoff with clear responsibility.

Ready does not have to mean every question is closed. Open work must be reviewed and owned.



Handoff inbox > Acme Logistics > Accept handoff

Accept handoff

CUSTOMER	SALES OWNER	TARGET LAUNCH	FLAGGED GAPS	HUMAN-REVIEWED
Acme Logistics Warehouse Ops · Reno pilot site	Priya Raman Account Executive	Fri, Nov 13, 2026 29 days after signing	1 of 2 resolved 1 follow-up open	8 of 14 details

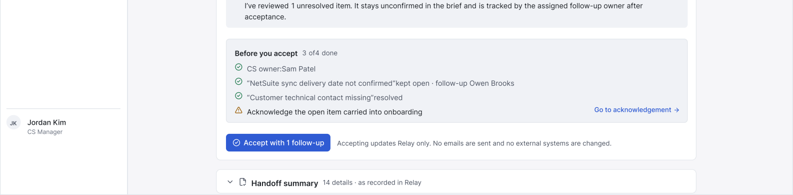
Confirm ownership

CS owner*: Sam Patel · Onboarding Specialist

Flagged gaps

NetSuite sync delivery date not confirmed
Reviewed · unconfirmed, carried into onboarding
Owen Brooks · Solutions Engineer

✓ Customer technical contact missing
Resolved · Source: Introduction from Dana · Oct 19, 2026



I've reviewed 1 unresolved item. It stays unconfirmed in the brief and is tracked by the assigned follow-up owner after acceptance.

Before you accept 3 of4 done

- ✓ CS owner:Sam Patel
- ✓ "NetSuite sync delivery date not confirmed"kept open · follow-up Owen Brooks
- ✓ "Customer technical contact missing"resolved
- ⚠ Acknowledge the open item carried into onboarding

Accepting updates Relay only. No emails are sent and no external systems are changed.

Handoff summary 14 details · as recorded in Relay

Name the CS owner — Ownership is required before acceptance.

Handle every flagged gap — Resolve the detail or keep it open with a follow-up owner. Unreviewed gaps block acceptance.

Acknowledge what continues — Open items remain visible in onboarding. Acceptance records a clear handover.

06 / VISUAL FOUNDATIONS

A consistent visual language.

Simple foundations and linked components keep the review experience consistent.

Action blue	Primary text	Canvas	Borders	Needs review	Confirmed
#2F5BD3	#1F2329	#F6F7F9	#E3E6EB	#9A5B00	#1F7A4D

Typography

Inter for headings, labels and body text. DM Mono for timestamps. The product uses a compact hierarchy: 20/28 headings, 13/20 body and 11–12 px supporting labels.

Spacing & surfaces

A simple 4–32 px spacing scale, white surfaces, subtle borders and restrained colour. Amber marks review work; green marks confirmed states. Text labels explain each state.

Reusable patterns: evidence badges, buttons, inputs, fact rows, source cards and review panels. Instances stay connected to the main components.

07 / NEXT STEP

What needs to be tested next?

The intended value is clearer handoff decisions. Real impact still needs validation.

Design decisions

Put evidence beside the draft. Separate "where it came from" from "who checked it." Give missing information an owner. Require deliberate acceptance.

Next usability test

Ask Sales and CS participants to review this handoff. Can they spot the unconfirmed delivery date, find its source, assign a follow-up and explain what acceptance means?

What I would measure

Task completion · time to find the supporting evidence · incorrect acceptance attempts · understanding of open follow-ups

Scope & limitations

This is an independent concept with fictional data and simulated AI. It has not been tested with users or deployed as a production tool. The prototype explores a handoff workflow; it does not claim measured business outcomes.

Design takeaway: a useful AI handoff needs visible uncertainty, nearby evidence and a clear human decision.
