
ZENSENTA / CLINIC MANAGEMENT UI CONCEPT

A clearer view of the clinic’s daily work.

A desktop workspace for managing reservations, stock orders and financial records.

THE DESIGN CHALLENGE

Clinic teams need to track appointments, supplies and payments. Each task needs clear information without losing the wider context.

THE APPROACH

Bring these tasks into a consistent workspace, using a calendar for time, tables for records and a detail panel for focused review.

Plan the day

Reservations → choose an appointment → review the details.

Track supplies

Stocks → review an order → check its receiving status.

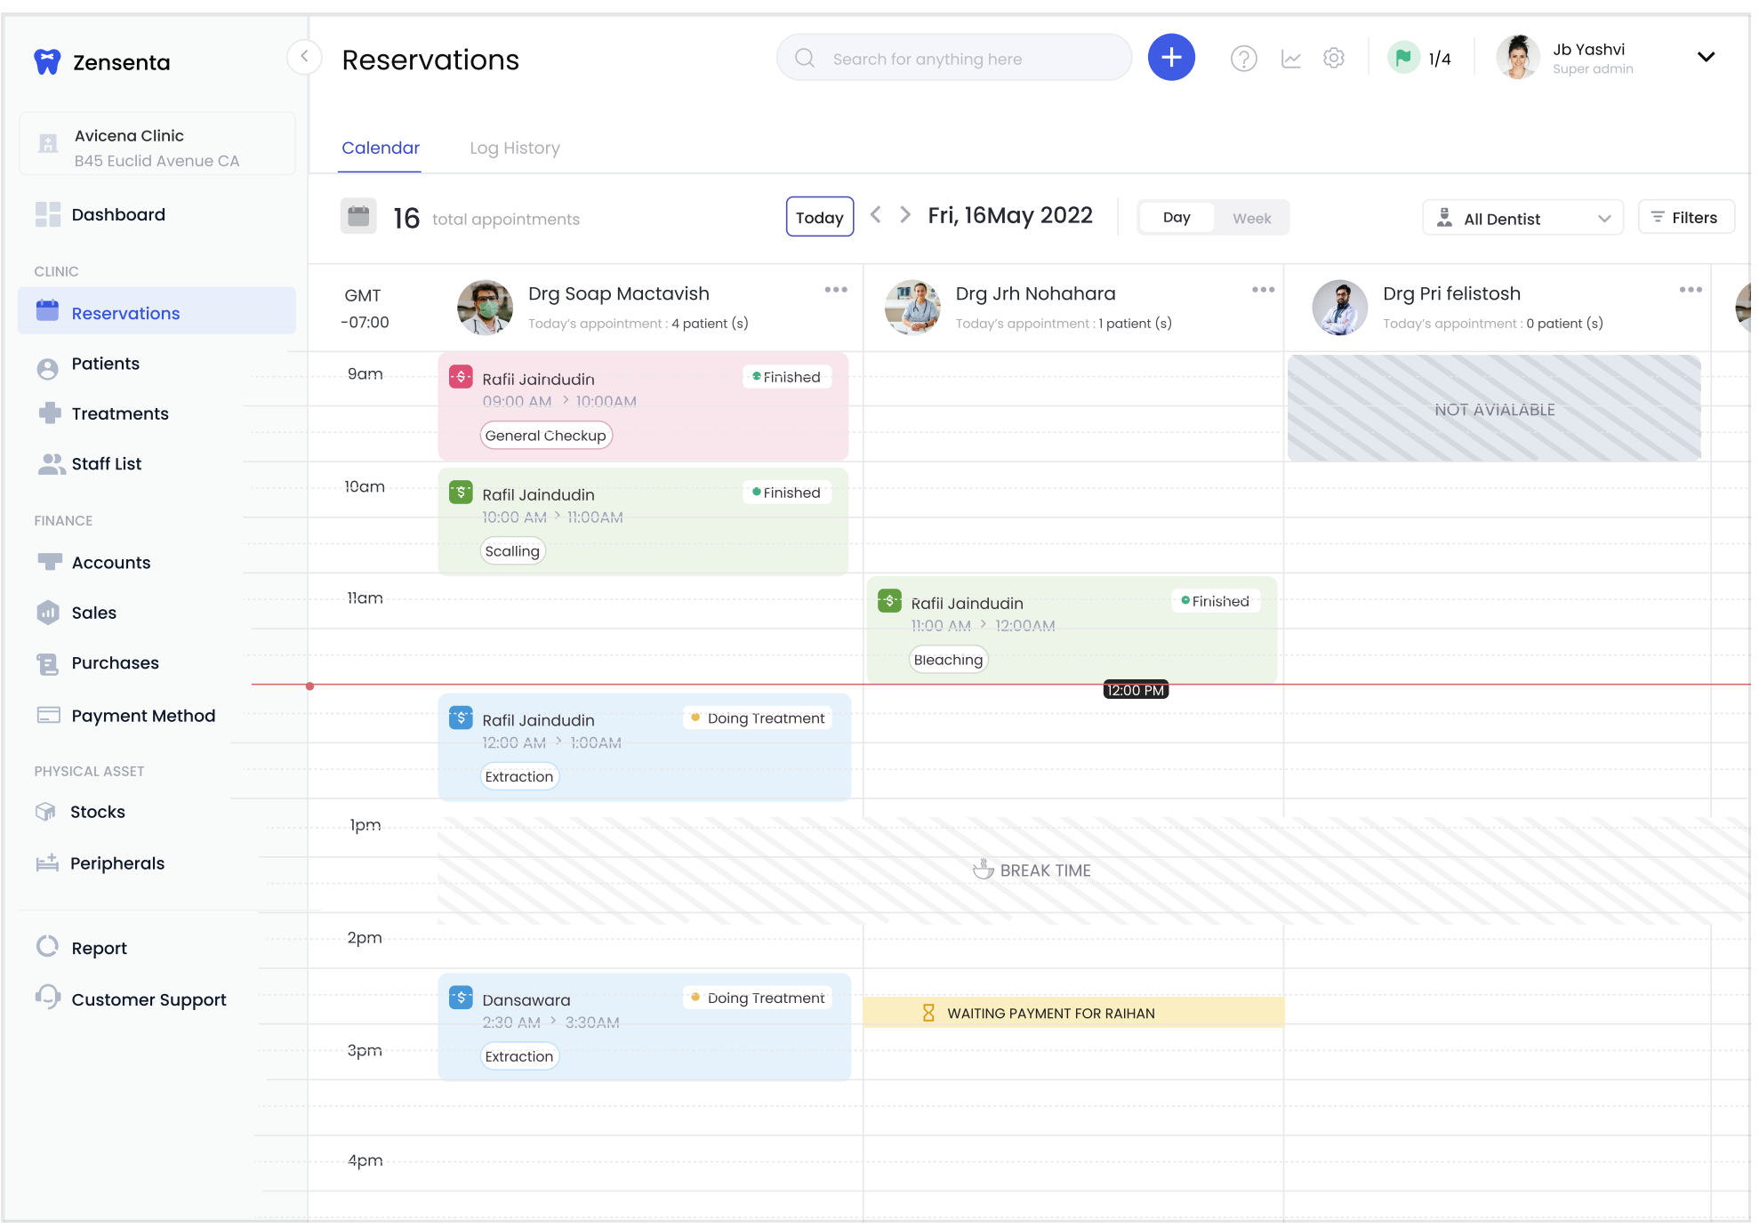
Review finances

Sales or Accounts → scan payment and account information.

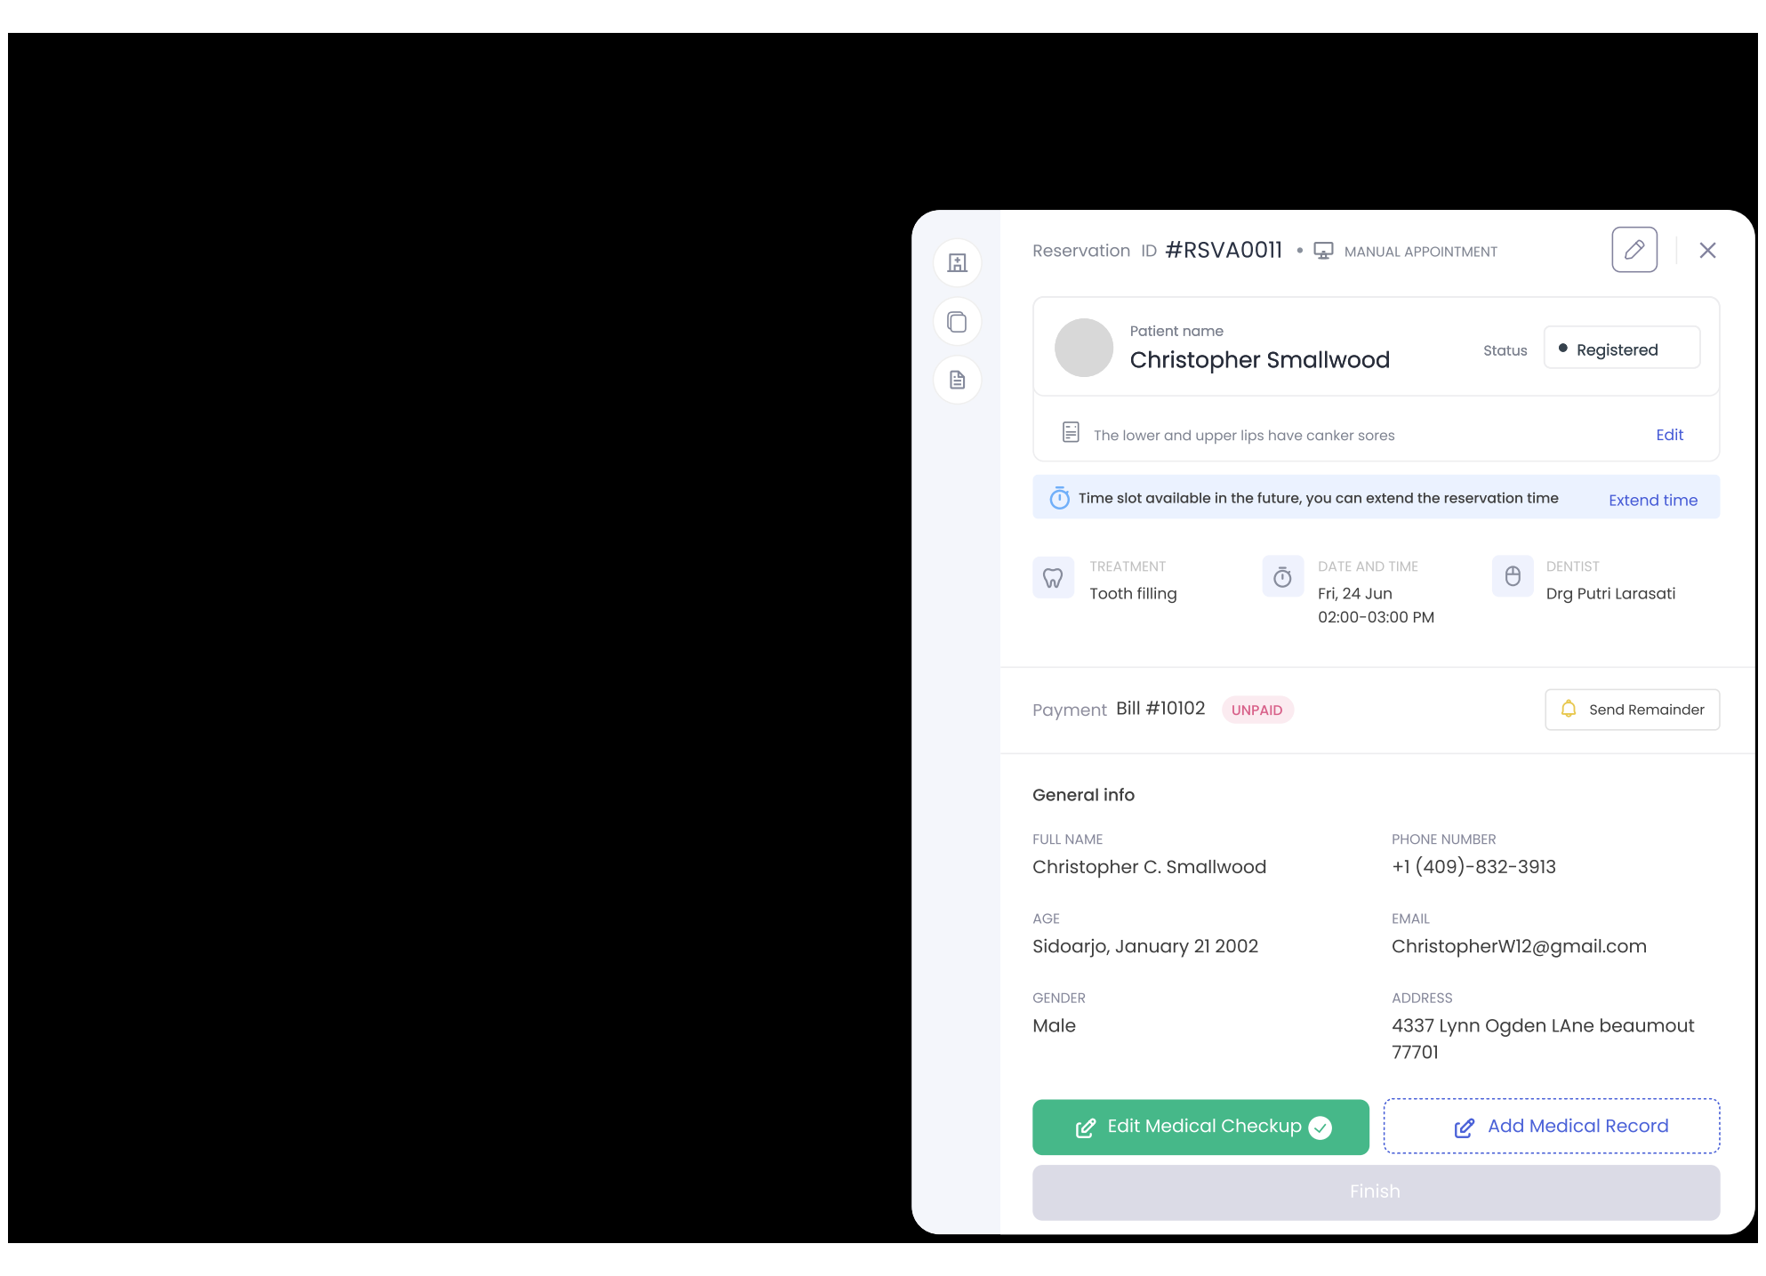
01 / RESERVATIONS

See the day. Open the details.

A shared calendar makes appointments visible by time and dentist. A side panel keeps patient, treatment and payment details beside the schedule.



Calendar / Compare time slots and dentist schedules



Reservation ID #RSVA0011 • MANUAL APPOINTMENT

Patient name: Christopher Smallwood

Status: Registered

The lower and upper lips have canker sores

Time slot available in the future, you can extend the reservation time

TREATMENT: Tooth filling

DATE AND TIME: Fri, 24 Jun 02:00-03:00 PM

DENTIST: Drg Putri Larasati

Payment Bill #10102 UNPAID

General info

FULL NAME: Christopher C. Smallwood

PHONE NUMBER: +1 (409)-832-3913

AGE: Sidoarjo, January 21 2002

EMAIL: ChristopherW12@gmail.com

GENDER: Male

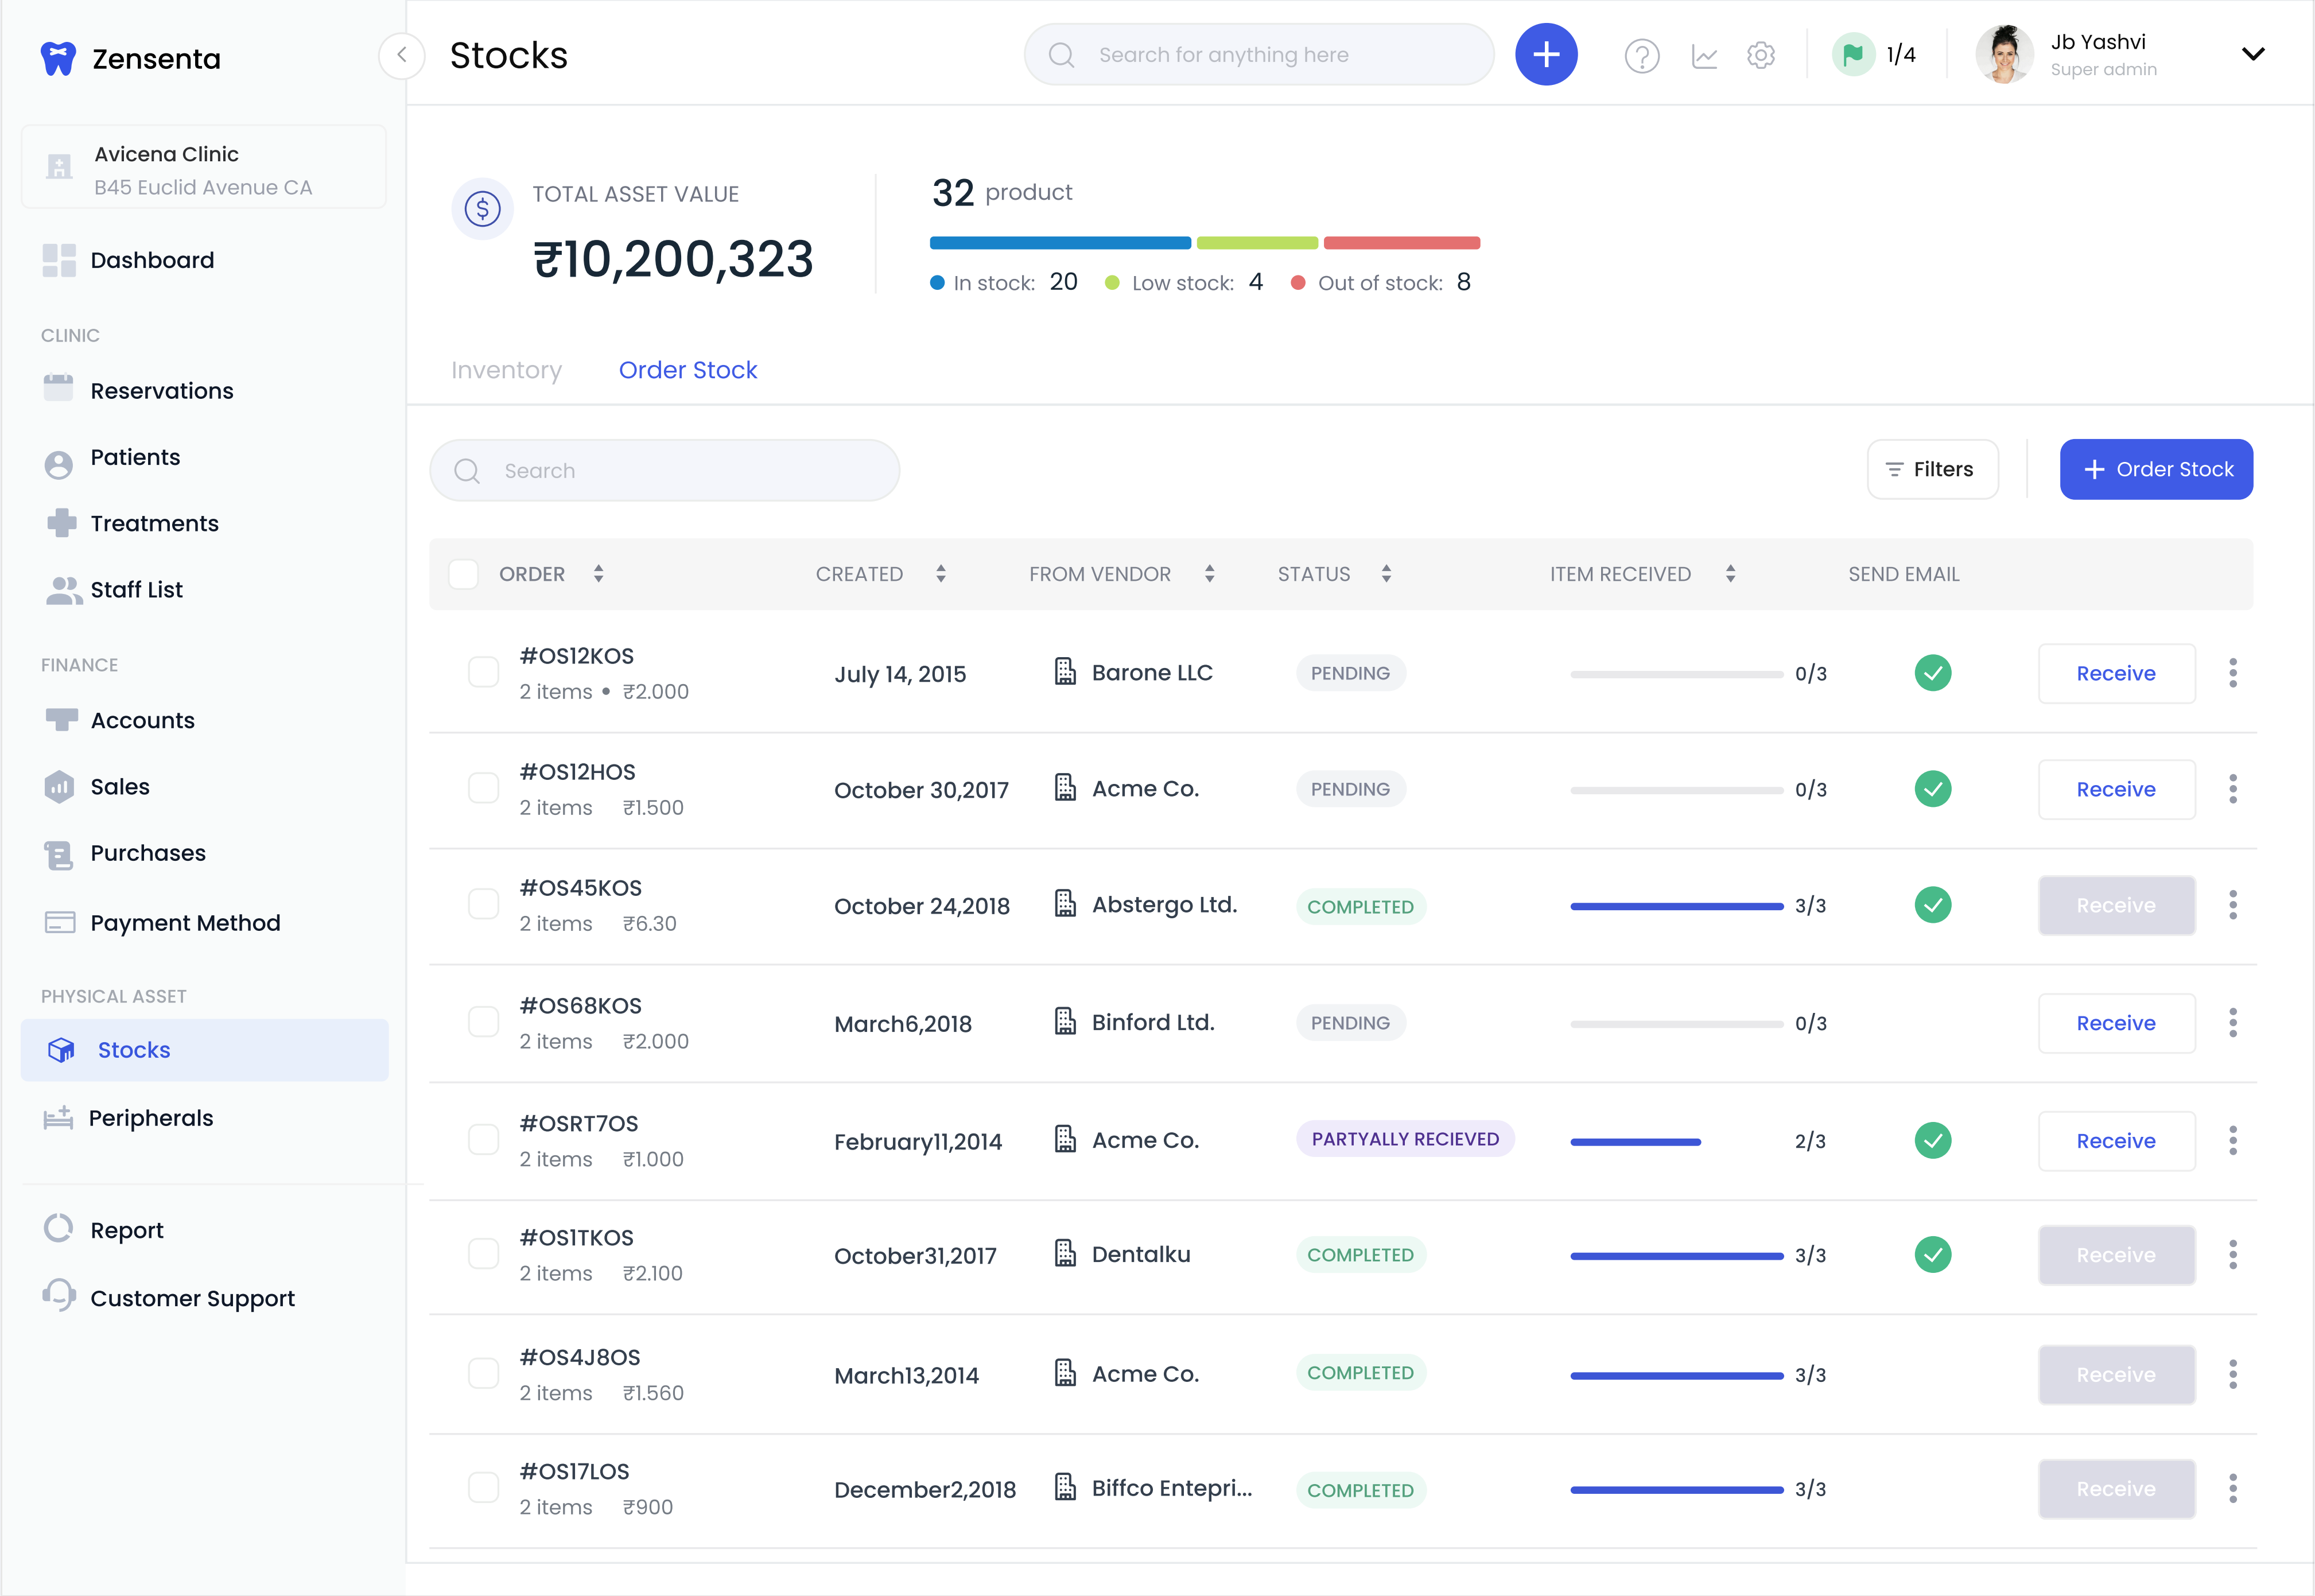
ADDRESS: 4337 Lynn Ogden LAne beaumout 77701

Detail panel / Review one reservation in context

02 / STOCKS

Know what has arrived—and what has not.

Orders stay in a scannable table with vendor names, status labels and received quantities. Progress indicators help distinguish pending, partial and completed orders.



TOTAL ASSET VALUE ₴10,200,323

Order stock / Review vendors, receiving progress and order actions

03 / FINANCE

Separate the overview from the records.

Summary figures provide context. Sales rows show payment status, while account cards group balances into active and inactive accounts.

APP TYPE SCALE / ACTUAL SCREEN VALUES

Page titles · Regular · 20 px

Key values · Medium · 24 px

Navigation & records · 11–13 px

Status labels & supporting text · 9–12 px

The original desktop screens use a compact type scale.

REUSABLE CONTROLS / SHARED INSTANCES

Filters PENDING COMPLETED PARTIALLY PAID FULLY PAID

Consistent navigation

The same sidebar and header help connect the clinic’s different tasks.

Visible status

Text labels sit beside colour and progress indicators to explain the current state.

Reusable structure

Shared controls, appointment cards and navigation components support consistent edits.

NEXT STEP / VALIDATE THE WORKFLOWS

Test whether clinic staff can find an appointment, understand an order’s receiving status and identify an unpaid bill.

This case study describes the UI concept. User research, usability results and business impact have not been established.
